Skills

Languages:	C#, C++, Python, Java, Dart, C, Javascript, Rust, PHP, Haskell, SQL
Game Development:	Unity, Unreal Engine, OpenGL
Development:	LaTeX, HTML, CSS
Frameworks & Tools:	Flutter, Git, CI/CD, Kanban, Docker, Android, iOS

ABOUT ME

I'm a Computer Engineer and Game Developer with over 7 years of professional experience specializing in scalable architecture, gameplay systems, and tool development. Proven track record of delivering cross-platform titles across mobile, desktop, and web systems using Unity and C#, complemented by professional experience building mobile apps in Flutter and backend systems using Python and PHP. Expert in designing modular code, custom editor tools, and automated deployment pipelines to optimize workflows.

WORK EXPERIENCE

Let's Talk Media

Full-time Remote, Software Developer

OCT 2025 – APR 2026

Unannounced project, developed with Flutter ⚡ for iOS/Android.

- Translated UI/UX designs into responsive, high-performance cross-platform interfaces using Flutter.
- Developed and maintained robust backend systems, optimizing API endpoints and database performance using Elastic and Python.

Nabos Studios 🎮

Full-time Remote, Gameplay Programmer/Cinematics

SEP 2024 – JUL 2025

Jason Maxx. Narrative/Exploration game developed with Unity 🎮.

- Designed and implemented core gameplay systems, including fluid character movement mechanics and interactive environmental systems in Unity (C#).
- Built different UI systems in Unity (C#).
- Built custom Unity editor tools to streamline the design workflow, reducing environment setup times for content creators.
- Implemented cinematics for the game.

Learn Safari 🦊

Full-time Remote, Full Stack Developer

FEB 2019 – DEC 2024

Educational mobile apps for kids to learn a new language using minigames for *iOS/Android/Web*, developed with Unity 🎮. Apps: *Spanish Safari, Safari Inglés*.

- Game design of the minigames in the lessons in Unity.
- Developed and maintained robust backend systems using Laravel.
- Built custom Unity editor tools to streamline workflow.
- Designed and developed core new features for the app in Unity.
- Managed and optimized server infrastructure and database performance.
- Engineered and deployed an automated CI/CD pipeline.

Simón Bolívar University

Part-time, Instructor

JAN 2018 – APR 2018

EDUCATION

Computer Engineering, Simón Bolívar University (Bachelor's Degree)

CARACAS, VENEZUELA JUL 2023

Degree: Computer Science

Grade: 4.0/5.0

Elective Courses: Programming Languages, Artificial Intelligence, Algorithms Design, Computer Graphics

Internship subject: Automation tools

GAME DEV PROJECTS

Project Avatar

PRIVATE 2022 AND ONGOING UNITY, C#

Top down Action RPG made in *Unity*.

This project started as a personal challenge to create deep systems and create a game with a bigger scope.

Still work in progress.

Tiny Graphics Odin

PUBLIC 2026 AND ONGOING ODIN, SDL3, GAME ENGINES

Custom mini graphics engine built from the ground up to master modern graphics pipelines, utilizing Odin for superior memory control and SDL3 for low-level hardware abstraction.

Reconstru-Bot

CARACAS GAME JAM 2020 UNITY, C#

Game made for the Caracas Game Jam 2020. An art deco adventure of a robot that wants to repair the world and follow his dreams.

Prince of Graecia

CARACAS GAME JAM 2021 UNITY, C#

Game made for the Caracas Game Jam 2021. The God Apollo has taken away Orion's powers, darkening the stars of his constellation. Now Orion has to defeat the servants of Apollo to return the light to his stars and regain his powers.

SOFTWARE PROJECTS

Tac To Mips

PUBLIC 2021 C++, MIPS

Translator from Three Address Code to MIPS Architecture (specifically to MARS).

Eumacclang

PUBLIC 2021 C++, FLEX, BISON

General-purposed programming language developed in the courses CI4721 - Programming Languages II and CI4722 - Programming Languages III. Implemented lexical analysis, parsing, and code generation phases using Flex, Bison, and C++.

Eulang

PUBLIC 2020 C++, FLEX, BISON

General-purposed programming language developed in the courses CI4721 - Programming Languages II. Implemented lexical analysis and parsing using Flex, Bison.

ROS Project

PRIVATE 2021 PYTHON, DOCKER

Mini project made with ROS and Gazebo to make functionalities for a Pepper bot.

Backoffice

PRIVATE 2019 PYTHON, HTML, CSS

Web application for the management of hours and tasks worked by human talent within a company.

KEVIN MENA

Languages

-  Spanish (Mother tongue)
-  English (Fluent Professional)
-  Japanese (Basic)

Qualifications

- | | |
|-----------|--|
| 2019-2020 | President of DELU (Video Games Development Club at Simón Bolívar University) |
| 2020 | Organizer Caracas Game Jam |
| 2022 | Assistant Organizer Caracas Game Jam |
| 2018 | Voice dubbing and Neutral accent Course |
